We offer several classes on line for  
clock and contact hours!

### Overview:

This class was designed for the novice professional who is wanting to learn Joint Commission On Accreditation for Healthcare Organization's standards and processes.

The class overviews the regulatory process including how having JCAHO conduct the initial medicare survey flows with the State's regulatory requirements. In addition, the class overviews the JCAHO National Patient Safety Goals and segments of operational systems that need to be in place and understood in order to pass the initial JCAHO Medicare survey.

The class includes many sample handouts for the students to review and refer back to as a guidance in learning JCAHO requirements.

Kimberley Kelly RN, BSN, LNC has worked with JCAHO standards and systems since 1995 and has assisted numerous agencies to pass not only their initial survey but their triennial surveys as well. Compliance Review Services, Inc. has strived to make the information in this class understandable and has tried to simplify the language for the new professional to JCAHO to understand. The feedback on this class has been very positive. We have taught over 100 people in 2007 alone. For dates that the class is offered please go to our website at [www.compliancereviewservices.com](http://www.compliancereviewservices.com).

Cost for Course: \$169.00

Class Time: 10 am-4 pm
